

Evidence Pack ID ep_demo_2026_05_09_001

Issued 2026-05-09T14:22:31Z

Subject worker-agent:invoice-reconciler

Purpose Friday invoice reconciliation and export review

What this proves

- Mint receipt: scoped authority issued by satgate-mint-2026-05.
- Delegation chain: parent authority attenuated to invoice-reconciler.
- Spend ledger: internal API plus x402-style bridge spend attribution.
- Denials: scope_violation:no_customer_data_export and budget_exhausted.
- Revocation: worker authority revoked, then first post-revoke call blocked.
- Export receipt: producing this Evidence Pack is itself auditable.

Maps to audit controls

Artifact	Control mapping	Why it matters
Mint receipt - SOC 2	SOC 2 CC6.1	Logical access provisioning evidence
Mint receipt - ISO	ISO 27001 A.9.2.1	Registration/de-registration trail
Delegation chain	SOC 2 CC6.3 / NIST AC-3	Least-privilege attenuation
Revocation proof	SOC 2 CC6.2/CC6.3 / NIST AC-2(3)	Deprovisioning + denied call
Spend ledger	SOC 2 CC1.4 / FinOps	Governance and spend attribution

Why this beats logs

Reconstructing agent authority from gateway logs, invoices, IAM records, and screenshots can take hours across multiple systems. SatGate packages the signed mint receipt, attenuation chain, payment rail context, revocation proof, and export receipt into one file.

Chain root sha256:f04ed8430b11c8975cc5ef35919ee078fc4cb166cd8d611ed0d94b7da69df09d

Signature ed25519:REDACTED_DEMO_SAMPLE_DO_NOT_VERIFY
